UNIQUE LIGHTS

## ELOA – UNIQUE LIGHTS

Light objects float weightlessly in space. Fragile, iridescent, timeless. Solitary, or in constellation, ELOA lamps create individual light concepts that remind us of star constellations. Hence the objects' names.

ELOA combines the craft of ancient glassblowing with a simple, yet distinct design. To achieve the large size of the glass objects while working without forms requires a high level of refined craftsmanship and skill, which can only be performed by a few master glassblowers in Bohemia. These objects exist as hanging, floor, standing, and wall luminaries as well as bowls and vases.

ELOA was founded in 2015 by the Swiss designer Simone Lüling, who is based in Berlin. Simone Lüling designs and coordinates the objects with the vision of combining simplicity and high-quality artisanship.

## HAUMEA

Haumea is an elliptical asteroid with a crystalline surface. ELOAs HAUMEA is topped with the clear brilliance of crystal. This brilliance then blends down softly into gradients of milky color, which can seem wonderfully polar or soothingly warm depending on its orientation within your gaze. Its shape is quiet, balanced, peaceful, and harmonious, helping it to become one with the room while grounding the space. The integrity of the blown glass gives it the flexibility of looking beautiful anywhere, whether used as a table piece or as a ceiling lamp.

## DWARF PLANET

DWARF PLANET lamps emit a soft light into your space, their appealingly rounded forms reflecting the individualistic irregularities of the celestial bodies for which they are named. These handmade lamps are available in many colors and are flexible enough to be used in many different ways to suit your particular lighting needs. They can invoke the presence of the universe, whether positioned high in the room or near the floor, and will add a sumptuous atmosphere to your surroundings.

BLUE IRIDESCENT L · PURPLE IRIDESCENT XL · SILVER SMOKE XL

## DSCHUBBA

As the middle of the Scorpion-constellation's forehead, DSCHUBBA radiates from its glowing center of life and light. DSCHUBBA is the glass-born materialization of drifting soap bubbles or of shimmering air bubbles dancing in the sea; and may even call to mind the idea of speech balloons hanging in space, filled with wonderful words. They give us a soothing atmosphere to float and dream in, helping us to feel lighter and calmer as they harmonize the room. DSCHUBBA is a fascinating and poetic light sculpture, whether as pure crystal or in any of the iridescent colors in which it is available.

## IZAR

As one of the brightest double stars in its constellation, IZAR encapsulates the vibrant yet tranquil movement of the world around us. With its cloud-like shape and its saturated coloring, this hand-blown piece can be placed on a table, shelf, or floor for a unique and irreplaceable accent. When IZAR is illuminated, its depths of detail shine through the bubbles and shades of coolness or warmth that swirl around its curves. With a unique and subtle friskiness, this double-star-inspired lamp emits the invigorating feel of the sea or the serene calm of a morning sky, bringing the sensuality of the blue and gold roots of all colors into your space.

GOLD M · OCEAN BLUE M

## SIRIUS

SIRIUS is the most visible star in the sky. SIRIUS combines the liveliness of light with the beauty of organically rounded horizontal shapes – bringing a majestic feeling of levitation into your space. It sparkles, suspended from the ceiling, with its pleasingly irregular form creating an impression of quiet movement throughout the room. Its iridescent amber hues contain all the colors of the light spectrum – giving out a warm glow and surrounding you with a cozy cocoon of calm.

## PLANETOIDS

PLANETOIDS are small asymmetrical objects that float delicately in space. Combine their various forms and colors to custom-design the celestial ambience of your room. PLANETOIDS are available as individuals or in trios, quartets, quintets, etcetera, etcetera, etcetera, for creating infinite variations of your own, personal constellations.

## STATI X

Inspired by the stars in design and name, the STATI X combines function with a uniquely eccentric style. With its handmade wooden tripod base, featuring finely crafted metal fixings, it carries us off in much the way that a telescope would - showing us a sky of endless possibilities. Off to the side or as a centerpiece, its presence is subtle but always regal. With this hand-blown lamp, you can easily adjust its brightness of mood to your preference.

STATI X comes in two wonderful color variations. The Amber Iridescent version, with its exclusive hand-blown bulb, brings the glow of a sunset into the realm of your personal living space. In Silver Smoke, this lamp surrounds you with the quietly elegant serenity of moonlight. These heavenly beings have a presence all their own; stabilizing and illuminating.

## SUPERNOVA

SUPERNOVA is a rare and magical visual phenomenon that manifests itself as a quick brightness. Exploding stars are the cause of this beauty in nature – and at ELOA. SUPERNOVA was developed after a lucky accident led to the falling of a glass globe. Once the cracks were cut off, new opportunities and functionalities were discovered. SUPERNOVA is a collection of vases and bowls that, though they don't shine themselves, none the less add sparkle to the environment around them.

CORAL XL XL XXL L XL

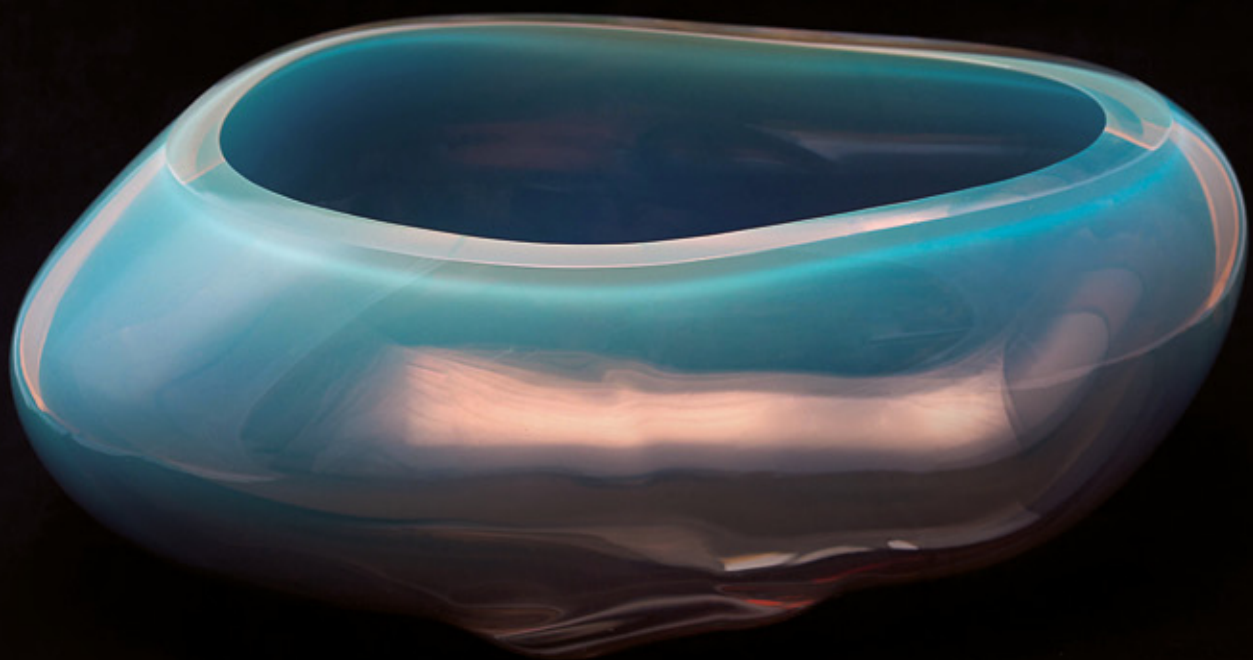

## SUPERNOVA I

The organically shaped bowls of different sizes and forms offer multiple opportunities for poetic harmony. Its iridescent amber contains all the colors of the spectrum and fascinates everyone, who comes in touch with it.

## GLASS

We use high quality crystal glass. Irregularities may arise naturally, as this is a characteristic sign of mouth-blown glass.

## DIMENSIONS

Dimensions may vary, as these objects are mouth-blown without wooden moulds. Each object is unique.

## COLORS

The colors may also vary in gradation, as each basic color contains many variations within itself.

## ILLUMINATION

The luminaries comes with LED bulbs. Dimmable luminaries are with halogen bulbs.
